#### Statement on behalf of the Board

Oxford Technology 2 VCT is now close to being fully invested, in the sense that it is unlikely to invest in new companies. Its remaining capital is intended to make follow-on investments in existing investees.

Net assets per share have increased from £0.99 at 28 February 2001 to £1.48 at 31 August 2001. But almost all of this rise is accounted for by the rise in value of one investment, and this company has yet to achieve any sales, so that the risks remain high.

The Board is pleased with the development of the portfolio as a whole. Details of the investments are given in the September 2001 newsletter.

On behalf of the Board. John Jackson 1 October 2001

### Notes To The Unaudited Financial Information on pages 2 and 3

- 1 The financial information for each of the interim periods ended 31 August 2001 and 31 August 2000 is unaudited and does not constitute statutory accounts within the meaning of the Companies Act 1985. It has been prepared using accounting policies consistent with those set out in the company's statutory accounts for the period ending 28 February 2001. The financial information for the period ended 28 February 2001 has been extracted from the company's statutory accounts for that period which contained an unqualified audit report and which have been filed with the Registrar of Companies.
- 2 The calculation of earnings per share for the period is based on the return attributable to shareholders divided by the weighted average number of shares in issue during the period.
- 3 Listed investments are stated at market value based upon middle market prices at the accounting period end. The unrealised depreciation or appreciation on the valuation of investments and the gains and losses arising on the disposal of investments are dealt with in the capital reserve.
- 4 Copies of the Interim Statement are being sent to shareholders and further copies can be obtained from the Company's Registered Office.
